

SUSTAINABILITY INITIATIVES

1. Eco-efficiency

Our warehouses have provision for natural illumination that will help locators reduce their electricity consumption during daytime.

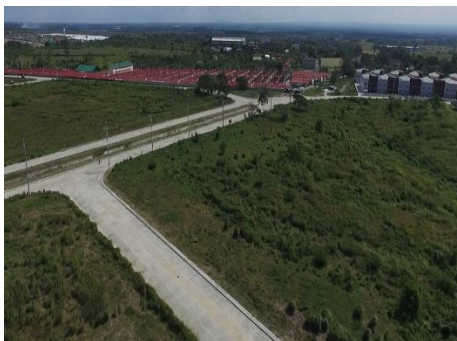

In our retail centers, aside from strictly monitoring water and electricity usage, we use energy efficient materials and machinery to help minimize water and energy consumption.

Specific to Tutuban Center, we utilized recyclable materials in building our nursery plans.

We likewise ensure strict compliance of tenants on proper waste segregation.

2. Site Resilience

Our industrial parks' facilities strive to protect the environment with the construction of detention pods. Its purpose is to collect the rainwater and regulate the release into the discharge channels. This mitigates flooding in the park and the surrounding communities.

PrimeOrion Philippines, Inc.

3. Pedestrian Mobility and Transit Connectivity

In all of our developments, we allocate transport terminals for our stakeholders and customers' ease of accessibility.

These terminals are guaranteed secured with the presence security personnel.

Furthermore, soon, our Tutuban Center will be Manila's center of transport as it will be the common station for the PNR NSRP and LRT2 West Extension.

4. Local Economic Development

Our projects continue to contribute to local employment and support the nearby communities.

Notably, In PEZA 2014 report, Laguna Technopark generated over 100,000 direct employment; meanwhile Cavite Technopark provided 20,000 jobs to Filipinos.
