Paglingap sa Pangarap (Nurturing the children's dream for good education)

2015

We believe that social responsibility and community involvement are a crucial part of our mission. We believe in helping build better, stronger and more sustainable communities in places where we do business by supporting programs that foster the education of our youth.

The children of Barangays 48, 49 and 51 in the City of Manila hold a special place in our hearts. Volunteers from TPI and POPI happily worked hand in hand with local merchants and partners to hold a Fun Day for the Day Care Centers in February, gave free haircuts in May, and in preparation for the school year, helped in the renovation and repainting of the classrooms of Barangay 49 last June. Over 300 students were delighted recipients of school supplies last July, as Gregorio Perfecto High School in Tondo also received computers to boost their IT classes and the restoration of their e-library.

With these modest initiatives, we are committed to continue building authentic relationships with communities around us, to do more, and find more opportunities where we can enable meaningful change especially in endeavours that help shape and develop young minds.

2016

In 2016, we continued to reach out to the communities where we do business as a way of sharing part of our blessings. We maintained various initiatives in partnership with the communities and our employee-volunteers.

Before classes began in July, volunteers from POPI and TPI joined efforts to clean and repaint the Day Care Centers. Donation of school materials were also given to the children of Barangays 48, 49, and 51. In July, employee-volunteers conducted a weekly feeding program for the children. Around 120 children from Barangay 48 and 49 were treated for a Fun Day and gift-giving through our Christmas Outreach program.

In our small way, we aim to contribute to a brighter future for the children by nurturing their dream for good education.
